PRECISION METAL STAMPING FOR THE HIGHEST INDUSTRIAL DEMANDS

Automotive, electrical, electronics and many other **industries** rely on our expertise to meet their most demanding **metal stamping requirements**. As technology continues to evolve, so do the challenges surrounding **precision stamping** — and we meet these challenges every day as a **reliable industrial partner**.

Our **high tonnage presses** are designed for stamping and forming of a wide range of materials and material thicknesses. This enables us to deliver **cost-effective, repeatable and low to high-volume manufacturing** solutions tailored precisely to our customers' individual requirements.

Compared to conventional manufacturing processes, our press line provides a decisive competitive advantage — both in terms of **production costs** and overall **operational efficiency**.

PERFORMANCE PORTFOLIO OF OUR PRESS LINE

BASE MATERIAL THICKNESS
From 0.2 mm up to a maximum of 4 mm

TABLE SIZE
Up to 2.000 mm in length and 1.250 mm in width

PRESS FORCE
More than 250 t

OPERATIONS
Stamping, punching and deep drawing, including inline assembly of components such as nuts and bolts

MATERIALS
All types of metal strip materials, including steel, stainless steel, aluminium, copper and copper alloys

QUALITY
Through continuous quality monitoring during and after the stamping process, we ensure component finishing at the highest level.
